

1. Presentation

Create a 15-slide professional presentation on Artificial Intelligence and Machine Learning for beginners. Include AI fundamentals, machine learning, supervised learning, unsupervised learning, deep learning, NLP, generative AI, real-world applications, career opportunities and a conclusion. Use a modern corporate technology design.

2. Course poster

Create a professional course advertisement for an Artificial Intelligence course in Doha, Qatar. Include Python, Machine Learning, Deep Learning, NLP, Generative AI and Computer Vision. Make it suitable for WhatsApp and Instagram.

3. Training material

Create a structured teaching document on Decision Trees and Random Forest. Explain theory, terminology, algorithms, advantages and disadvantages, Python examples, and two real-world case studies. Make it suitable for classroom training.

4. Research presentation

Create a professional academic presentation on my research topic "Bridging the gap between artificial intelligence and biology". Include problem statement, research gap, objectives, methodology, proposed framework, experiments, results, limitations and future work.
